Professional Summary

Computer Science student with internship experience in data science and machine learning. Skilled in Python, SQL, and data visualization, with hands-on project work in predictive modeling and deep learning. Certified in Machine Learning Intern in Unified Mentor, with projects deployed via Streamlit and published research paper contributions.

Skills

Programming: Python, SQL, NumPy, Pandas

Machine Learning: Scikit-learn, LightGBM, XGBoost, PyTorch

Data Skills: Predictive Analysis, Forecasting, Image Classification, Data Visualization

Tools: Git, VS Code, Jupyter Notebook, Streamlit

Experience

Machine Learning Intern – Unified Mentor | May 2026 – Aug 2026

Built and optimized ML models for customer churn prediction (ROC-AUC > 0.85).

Conducted EDA on datasets of 10,000+ records using Pandas and SQL.

Collaborated with mentors to align technical outcomes with business objectives.

Projects

Predictive Forecasting of Care Load & Placement Demand GitHub: [Repository](#) |
Streamlit: [Deployment](#)

Forecasted children in HHS care and discharge demand using ARIMA, SARIMAX, and ML models.

Engineered lag features, rolling averages, and net-pressure indicators to improve accuracy.

Achieved strong results: SARIMAX (MAE 23.7, R^2 0.973), Linear Regression (R^2 0.956).

Deployed interactive Streamlit dashboard with modules for care load forecast, discharge demand, model comparison, and confidence intervals.

Authored research paper detailing methodology, KPIs (Forecast Accuracy, Surge Lead Time, Capacity Breach Probability), and policy implications.

Customer Churn Prediction GitHub: [Repository](#) | Streamlit: [Deployment](#)

Developed classification models (Logistic Regression, XGBoost) with >85% accuracy.

Implemented feature engineering and hyperparameter tuning.

Deployed Streamlit app for real-time churn prediction and scenario simulation.

Image Classification with CNNs GitHub: [Notebook](#)

Built deep learning pipeline using PyTorch for multi-class image classification.

Achieved 90% accuracy with transfer learning (ResNet).

Certification

Machine Learning Specialization – [Coursera] | [2026]

<https://coursera.org/verify/DQS8E1ICXNHJ>

Education

B.Tech, Computer Science & Engineering Maharaja Agrasen College of Engineering & Technology – July 2026(CGPA-7.6)

Diploma in Mechanical Engineering Government Polytechnic Gorakhpur – 2022 (79%)
